

# Cams Hill School

## Specialist School Community Outreach

### Primary Specialist Community Partnership Schools

Following discussions with Malcolm Price, Science Coordinator, we were delighted to have been able to use our Science Specialist funding to purchase and provide Harrison Primary School with the following Science resources:

- a model ear
- an inflatable model eclipse kit
- an inflatable model solar system
- balloons
- coloured acetate sheets
- giant magnets
- magnifying glasses
- overhead projector thermometer
- plastic mirrors
- safety spectacles
- thermometers
- tuning forks

We have also been able to purchase two digital balances and a set of data loggers as a shared resource for use by our Partnership Primary Schools. All these resources will further enrich the learning of Science at Harrison Primary School.
