

# Cams Hill School

## Specialist School Community Outreach

### Primary Specialist Community Partnership Schools

Following discussions with Rebecca Jalban, Science Coordinator, we were delighted to have been able to use our Science Specialist funding to purchase and provide Northern Junior School with the following Science resources:

**Model heart**  
**Model ear**  
**Model 1/2 skeleton**  
**Balloon car**  
**Balloon helicopter**  
**Air pump rocket**  
**Balloons and pump**

We have also been able to purchase two digital balances and a set of data loggers as a shared resource for use by our Partnership Primary Schools. All these resources will further enrich the learning of Science at Northern Junior School.
